

BASIC TYPE K THERMOMETERS 800011 & 800012

Although mini sized, light weight and inexpensive, these units provide extremely accurate and reliable temperature measurement with all the versatility and range of type K thermometers. An adjustment allows the user to easily calibrate the meter and probe to ice point, or any other standard. Also features relative temperature, min-max, hold, auto power off, and touch tone buttons. Model 800012 will read and display results from two probes simultaneously. Comes ready to use with a 9V battery and beaded wire probe (2 probes for 800012). Dim: 7 ¼" x 2 ½" x 1" (164 x 54 x 34mm). Weight: 6 ½oz (180g).

With NIST traceable certificate of calibration 800011C and 800012C

Range	Resolution	Accuracy
-200 ~ 1370°C & -328 ~ 2498°F	0.1° < 200° / 1° > 200°	±0.3% rdg + 1°C, 2°F: (-200 ~ 200°C&F and above 400°C&F, otherwise ±0.5% rdg + 1°C, 2°F

OPTIONAL ACCESSORIES

- 800010 Type-K Calibrator
- 800060 ~ 77 Type K Thermocouple Probes
- 840090 Water Resistant Instrument Pouch
