

TYPE K/J THERMOMETERS

800004 & 800007 - *New Models*

Although mini sized, light weight and inexpensive, these units provide extremely accurate and reliable temperature measurement with all the versatility and range of type K & J thermometers. Feature relative, minimum and maximum temperature, hold, auto power off, and touch tone buttons. Results are displayed on a large 1¼" x 1¾" LCD. Model 800007 will read and display results from two probes simultaneously and track the difference between them (T1-T2). Come ready to use with a 9V battery and beaded wire probe (2 probes for 800007). Weight: 6 oz (170 g). Dim: 5 ¼" x 2 ¼" x 1¼" (130 x 56 x 38 mm).

With NIST traceable certificate of compliance 800004C and 800007C

Probe	Range	Resolution	Accuracy
Type K	-200 ~ 1370°C & -328 ~ 2498°F	0.1°C	±0.3% rdg + 1°C, 2°F: (-200 ~ 200°C&F and above 400°C&F, otherwise ±0.5% rdg + 1°C, 2°F
Type J	-200 ~ 1050°C & -328 ~ 1922°F		

OPTIONAL ACCESSORIES

800060~97 Type K & J Thermocouple Probes
840090 Water Resistant Instrument Pouch
